AYM-60 Series
Electric Characteristic Note

AYM-60 Series EC Note

AC-DC Power Module 60W, Industrial & Medical Safety

Features

- **Fully Encapsulated Plastic Case for PCB, Chassis and DIN-Rail Mounting Version**
- **Universal Input 85~264VAC, 47~440Hz**
- **I/O Isolation 4000VAC with Reinforced Insulation**
- **Operating Ambient Temp. Range -40℃ to +80℃**
- **Overload/Voltage and Short Circuit Protection**
- **EMI Emission EN 55011/32 Class B Approved**
- **EMC Immunity EN 61000-4-2,3,4,5,6,8,11 Approved**
- **Medical EMC Standard with 4th Edition of EMI EN 55011 & EMS EN 60601-1-2 Approved**
- **Medical Safety with 2xMOPP per 3rd Edition of IEC/EN 60601-1 & ANSI/AAMI ES60601-1 Approved**
- **UL508 Safety Approval Specifically for Industrial Application**
- **Risk Management Report Acquisition according to ISO 14971**
- **UL/cUL/IEC/EN 62368-1(60950-1) Safety Approval & CE Marking**

Applications

- Distributed power architectures
- Workstations
- Computer equipment
- Communications equipment

Product Overview

Introducing the MINMAX AYM-60 series – a range of fully encapsulated AC-DC power modules designed to deliver superior performance, safety, and reliability. Engineered to excel across diverse applications, these high-performance products boast an impressive extended operating temperature range of -40℃ to +80℃, ensuring optimal functionality in challenging environments.

With a universal input voltage of 85-264VAC and robust safety approvals, including compliance with UL/IEC/EN standards for medical safety and UL 508 listing, the AYM-60 series is poised for seamless integration into products targeting global markets. These power supply modules have also received the esteemed EMI Emission EN 55011/32 Class B approval, attesting to their adherence to stringent electromagnetic interference standards.

In alignment with ISO 14971 Medical Device Risk Management, the AYM-60 series undergoes a thorough risk assessment process. This ensures that the power modules not only meet rigorous performance criteria but also align with the highest safety benchmarks outlined in ISO 14971. By seamlessly incorporating the AYM-60 series into your medical devices, you not only leverage state-of-the-art technology but also ensure compliance with risk management protocols.

Notes

1. This product is not designed for use in critical life support systems, equipment used in hazardous environment, nuclear control systems or other such applications which necessitate specific safety and regulatory standards other the ones listed in this datasheet.
2. Specifications typical at Ta=+25℃, resistive load, 115VAC, 60Hz input voltage, after warm-up time rated output current unless otherwise noted.
3. Ripple & Noise of PCB mounting type measured with a 0.1μF/50V MLCC and a 1μF/50V Aluminum electrolytic.
4. Safety approvals cover frequency 47-63 Hz.
5. We recommend to protect the converter by a slow blow fuse in the input supply line.
6. Other input and output voltage may be available, please contact MINMAX.
7. Specifications are subject to change without notice.
8. The repeated high voltage isolation testing of the converter can degrade isolation capability, to a lesser or greater degree depending on materials, construction, environment and reflow solder process. Any material is susceptible to eventual chemical degradation when subject to very high applied voltages thus implying that the number of tests should be strictly limited. We therefore strongly advise against repeated high voltage isolation testing, but if it is absolutely required, that the voltage be reduced by 20% from specified test voltage. Furthermore, the high voltage isolation capability after reflow solder process should be evaluated as it is applied on system.
